

PARTHA SARATHI BERA

SOFTWARE ENGINEER

+91 7679008023 | partha1253.be21@chitkarauniversity.edu.in | linkedin.com/in/partha-sarathi-bera | github.com/Partha-x-dev | Midnapore, West Bengal

SUMMARY

Computer Science Engineering graduate with hands-on software development experience at C-DAC Kolkata. Strong foundation in Data Structures & Algorithms, Object-Oriented Programming, and Operating Systems, with practical proficiency in Python, Java, and JavaScript. Experienced in building full-stack applications, automating data-processing pipelines, debugging, and software testing. Adept at problem-solving and writing clean, maintainable code to support reliable, high-performance systems.

PROFESSIONAL EXPERIENCE

SoftwareEngineer Intern | C-DAC Kolkata

Sep 2025 – Apr 2026

Project: Nidhaan – Intelligent Disease Detection Using Biosensor Arrays

(C-DAC Kolkata | MeitY, Government of India)

- Engineered Python scripts to process, parse, and automate raw sensor outputs into validated CSV datasets
- Executed data validation, debugging, and system troubleshooting to ensure pipeline data integrity
- Collaborated on technical documentation and testing for a national Government research initiative

TECHNICAL SKILLS

- Python, Java, JavaScript, DSA, OOP, Operating Systems, DBMS
- SDLC, Debugging, Testing & Validation, Troubleshooting, Code Optimization
- Web & Databases: React.js, HTML, CSS, MySQL, MongoDB
- Git, GitHub, AWS

CERTIFICATIONS

- AWS Technical Essentials
- Database Management Systems
- Python Programming
- Data Science & Generative AI

EDUCATION

Chitkara University

Bachelor of Engineering (Computer Science Engineering)

Aug 2021 - Aug 2025

- Coursework: DSA, Object-Oriented Programming, Operating Systems, DBMS, Software Engineering, Networks

PROJECTS

- TeenGro–Task Management Platform**
 - Built a responsive web app using Python and React to streamline task workflows and community management
 - Implemented backend data models, state handling, and conducted debugging to ensure reliable application performance.
- Government Jobs & Internship Portal**
 - Built a centralized web platform enabling users to search, filter, and track verified public-sector opportunities.
 - Implemented dynamic search and indexing algorithms to query structured job listings efficiently based on user criteria.
 - Optimized UI rendering and API consumption workflows to deliver seamless navigation and fast page-load speeds.
- Stock Trading Platform**
 - Developed a Python and MySQL platform to process market data and manage user trade transactions
 - Designed relational database schemas and optimized queries for accurate trade tracking and data retrieval.
